

School Year STEM Teachers – Position Description

Tech EdVentures (www.TechEdVentures.com) makes kids' dreams come true! We offer fun, educational technology programming for kids in grades K-8 using innovative curriculum and an immersive learning experience. Students learn how to code, design, animate and ultimately how to create new products. We inspire kids to move beyond technical skills and think like entrepreneurs. Have you got what it takes to teach and inspire? Then join us.

In this role you will:

- Teach and lead tech-ed classes at our various daytime and after-school locations.
- Bring ground-breaking tech education to the fingertips of excited kids that are hungry to learn.
- Learn our core curriculum and teaching method in-depth through a comprehensive teacher training program.
- Have an amazing experience that offers valuable teaching and leadership skills!

Education:

- Candidates for BA and MAs in all majors. We love educators, techies, artists, animators and gamers.

Qualifications:

We are looking for multiple skill sets including:

- Coding in Python, C/C++, HTML, CSS, JavaScript
- Arduino and basic electronics background
- Robotics experience
- Game design (with Game Maker)
- Blender
- Builders, tinkerers and creative thinkers

Who we are looking for to join this amazing team:

- Positive role models who take initiative and are committed to their own learning.
- Passion for working with children.
- Experience teaching in any setting, formal or informal.
- Available during duty flexible hours, with transportation.
- Must be pass a comprehensive background check.

Hours/Compensation:

- This is a part-time, contractor position
- Compensation based on hours and experience
