

Curriculum / Instruction Internship Position Description

Tech EdVentures (www.TechEdVentures.com) makes kids' dreams come true! We offer fun, educational technology programming for kids in grades K-8 using innovative curriculum and an immersive learning experience. Students learn how to code, design, animate and ultimately how to create new products. We inspire kids to move beyond technical skills and think like entrepreneurs. Have you got what it takes to develop new curriculum and teaching practices that will teach and inspire a new generation of builders and makers? Then join us.

Position Description:

- Assist Curriculum Development team in creating new STEM content, instruction writing, and the design and printing of curriculum materials
- Field test beta-curriculum and take an active role in documentation and process improvement of new instructional materials
- Create and administer curriculum implementation surveys
- Attend marketing events with the Community Outreach Associate and provide demos
- Provide general administrative support as needed

Education:

Candidates for BA and MAs in Education, Computer Science, Engineering, Arts and Technology encouraged to apply.

Qualifications:

- Excellent verbal and written communication skills
- Enthusiasm and initiative
- Understanding of child development, learning styles, and instructional strategies
- Teaching / hands-on educational leadership experience preferred
- Skilled in or ability to learn online collaboration/project management software.

Hours/Compensation:

- 7 to 15 hours / week desired
- In-office duties are unpaid / intern basis. Event staffing and teaching, if offered, is compensated competitively.

Note- This is an extremely competitive position and will be offered to a very small number of outstanding applicants. The Curriculum and Instruction Intern will work with high level and proprietary information and will be expected to sign legal non-disclosure agreements and pass a criminal background check.
